Inspiring the next generation.

Changing the way the world uses and produces energy isn't going to happen in one generation. FSEC works with educators to engage and interest students of all levels to help create a brighter energy future.

Directory

[K-12](#)

For many years, our K-12 program has generated some of the most student-friendly activities and curricula units available for renewable energy.

[University](#)

With a staff composed mostly of UCF faculty, our influence on university programs extends beyond technical subjects to making students more energy-aware.

[Continuing Education](#)

Education doesn't stop with a college diploma. These courses include buildings science, solar thermal and solar electric.

[Community Partnerships](#)

Partnerships build a stronger program. FSEC has many community partners.

Information

**[Utility Report Cards](#)**

A web-based energy information system that reports and graphs monthly utility data for schools.
